- H.323 and SIP support
- Media Encryption (H.323, SIP): AES-128

Effective group collaboration has never been more important in business communication. Geographically dispersed teams need to get more done with fewer resources making video collaboration a critical tool for improving meeting productivity and breaking down distance barriers.

The Polycom RealPresence Group Series (300, 500 and 700) brings a new standard of efficiency and productivity to your company's room-based group collaboration by combining great video experiences with a new breakthrough simple interface that's easy to use from day one. And with Polycom's commitment to open standards, your system will interoperate with millions of other devices across the globe without costing you a small fortune.

Incom are able to provide your organisation with a complete solution for your Video Conference requirements, from desktop to boardroom, single site office to multiple global locations.

CONFERENCING

The SoundStation2, Polycom’s next generation conference phone, is redefining the standard for business quality voice conferencing. With industry-leading full duplex for natural, simultaneous two-way conversation, the SoundStation2 will exceed your expectations in medium to small conference rooms.

SoundStation2®

- Built-in investment protection – Use in analog or IP mode and keep it up-to-date with simple online software upgrades
- Robust interoperability – Compatible with a broad array of IP call platforms to maximize voice quality and feature availability while simplifying management and administration
- Business continuity – Auto failover from IP to analog and failback for continuous operation in case of a network failure
- Unparalleled voice clarity – Polycom HD Voice technology makes your IP conference calls more effective and productive
- Easy to deploy and administer – Web configuration tool eliminates the need for a boot server
- Superior call handing, security, and provisioning – Leveraging the most advanced IP endpoint software in the industry
- Unmatched flexibility – Connect to mobile phones and PCs for Internet dialing

SoundStation2® EX

Additional Mics

• Phone book/speed dial list - up to 25 entries
• Up to 10 ft. microphone pickup range
• Backlit graphical LCD with caller ID
• Extra microphones available
• Dynamic noise reduction
• User selectable ringtones

Models available:

SoundStation2® Avaya
SoundStation2® Meridian

SoundStation® Duo

Whether your conference rooms use analog lines today or you’ve already migrated to Voice over IP (VoIP) telephony, the SoundStation Duo phone delivers the ultimate deployment flexibility for small to midsize rooms.

- Acoustic clarity technology for natural, simultaneous two-way conversations
- High performance mics and speaker (available for EX version only)
- Talk from two to 10 feet away from a mic and still be heard on the far end
- Enough talk time to go wireless for a week without recharging
- Works like a traditional conference phone, no training required, just set it up and go

SoundStation2® Wireless

• Wireless Mic

ClearOne CHAT® 50

A personal speaker phone and more

The ClearOne CHAT® 50-U connects to a wide variety of devices for crystal clear hands-free communications and audio playback. A perfect personal solution for road warriors and others who want rich full duplex audio that is portable and economical.

- Crisp, clear audio with true full duplex performance allows user to listen and speak at the same time without audio cutting in and out
- Multiple uses – laptops, Macs and PCs, telephones, mobile phones, desktop video conferencing, MP3 players
- Hands-free comfort - move around freely without being tethered to PC or telephone with headset
- Convenience - device is slightly bigger than a pack of cards, allowing for easy travel

ClearOne CHAT® 60-U

The ClearOne CHAT® 60-U is a personal speakerphone that provides full-duplex audio for hands-free calls with Skype. The CHAT® 60-U easily connects to laptops and PCs via USB for rich, natural-sounding audio communication. With HDConference™ audio technologies, the CHAT® 60-U is the perfect audio peripheral for anyone who wants a high-quality audio solution that is both portable and economical.

- Full-duplex audio performance allows users to listen and speak at the same time without audio cutting in and out
- Echo cancellation identifies and eliminates acoustic echo to deliver audio that is much more intelligible
- Noise cancellation samples the ambient room noise and cancels it out for more natural sounding conversations
- Automatic gain and level controls adjust microphone and speaker levels automatically

ClearOne CHAT® 70-U

The ClearOne CHAT® 70-U was created by ClearOne to fill the need for a hands-free speakerphone for individuals using Microsoft’s unified communications platform, Office Communications Server 2007. The CHAT® 70-U is a completely full duplex speakerphone that delivers superior hands-free audio for Office Communicator 2007 and eliminates the need to be tethered to the PC via a headset. Providing true plug-and-play operation, the CHAT® 70-U requires no drivers to be installed; just plug it into a USB port and all incoming Office Communicator calls ring on the CHAT® 70-U.

- The CHAT® 70-U has a sensitive microphone that provides 120 degree audio pickup up to 8 feet away and a large loudspeaker
- Echo cancellation identifies and eliminates acoustic echo to deliver audio that is much more intelligible
- Noise cancellation samples the ambient room noise and cancels it out for more natural sounding conversations
- Automatic gain and level controls adjust microphone and speaker levels automatically

CALL FOR BEST PRICING 0161 935 1000
ClearOne CHAT® 150 USB

The ClearOne CHAT® 150 USB connects to video conferencing systems for rich, full duplex audio communications. It provides microphone pickup and echo cancellation that is far superior to the built-in audio on video systems. It includes three built-in microphones for full 360 degree pickup.

The ClearOne CHAT 150 is a perfect addition to multimedia conference rooms for greatly enhanced collaboration. Also connects to PCs for VoIP applications.

- Experience full duplex audio for video conferencing systems
- Enable high quality speaker phone capabilities on PCs or laptops
- Connect the CHAT® 150 to laptops & PCs via USB for hands-free audio for VoIP, Instant Messaging Audio chats and web conferences

ClearOne CHAT® 160 USB

The ClearOne CHAT® 160 USB provides rich, full-duplex audio for hands-free calls with Skype. It easily connects to laptops and PCs via USB and is the perfect audio peripheral for individuals or groups who want a high-quality audio solution that is both portable and economical.

The CHAT® 160 USB is a completely full-duplex speakerphone that contains HDConference™. The suite of high-performance audio technologies found in ClearOne’s legendary professional conferencing systems.

- Contains HDConference™ audio technologies
- USB powered (2.0 compatible)
- 3 mics for full 360° audio pickup
- True plug & play operation
- Eliminates the need for large, expensive conference phones
- Replaces the PC’s speakers & microphone with a high-quality purpose-built audio solution

Tested & Certified by Skype

ClearOne CHAT® 170

A speakerphone for individual or small group use, the ClearOne CHAT® 170 connects to PCs and laptops for rich, full duplex audio communication with Microsoft Office Communicator 2007. The CHAT® 170 is the perfect addition to the office or conference room for greatly enhanced collaboration.

With 3 microphone elements and a large loudspeaker for a full 360 degree pickup, the CHAT® 170 easily manages 1 to 6 call participants. Full-duplex audio performance allows users to listen and speak at the same time without audio cutting in and out.

- Distributed Echo Cancellation™ identifies and eliminates acoustic echo
- Noise cancellation samples the ambient room noise and cancels it out for more natural sounding conversations
- Automatic gain and level controls adjust microphone and speaker levels automatically
- First microphone priority intelligently changes microphone levels depending on who is doing the talking
